# MANOËL NOHRA

## Gameplay / Software Programmer

manoel.nohra@gmail.com

manoel-nohra.fr | github.com/NohraManoel | linkedin.com/in/manoel-nohra

Eligible to work in Canada (PGWP) and the EU without sponsorship | English: professional working proficiency (CELPIP 8)

Software engineering graduate (ÉTS) with four programming internships (Ubisoft Montréal x2, Audiokinetic, CDRIN). Main programmer on an award-winning Ubisoft Game Lab game, now building a solo game in Unreal Engine 5. Comfortable in large C++ codebases and proprietary pipelines (Anvil, Perforce, Wwise).

## PROFESSIONAL EXPERIENCE

**Gameplay Programmer Intern (NEO Project)** | Ubisoft Montréal **2025 (17 wks)**

*Fighting Team of 8 | C++, Anvil engine | Agile, tasks from lead, peer-reviewed*

- Extended existing **combat telemetry** to send in-game events to data analysts for enemy and ability balancing.
- Built and adapted gameplay features for designers, e.g. a fog ability that grows with an equipped outfit.
- Debugged and fixed gameplay issues across health, input, animation, and targeting.

**Software Engineering Intern (Wwise Integration Team)** | Audiokinetic **2024 (16 wks)**

*Solo R&D mandate with mentor | C++/Blueprints, UE5 → Unity (C#)*

- Built a Wwise take on Unreal's Soundscape plugin: a **dynamic ambient-audio** demo for sound designers.
- Built raycast sound selection and indoor/outdoor zones, then ported the demo to Unity.

**Tools Programmer Intern** | Ubisoft Montréal **2024 (16 wks)**

*Team of 6 | C#, WPF/XAML, MVVM | Agile | shipped to main*

- Built **Shortcut Explorer**, a tool listing every engine shortcut, previously hard-coded with no way to find them.
- Parsed shortcut attributes from the C# code and added search and conflict detection; widely adopted.

**Programmer Intern (Urbia project)** | CDRIN **2022 (10 wks)**

*Client project, team of 5, main programmer | Unity/C# | educational city-builder*

- Added new buildings, rules, flooding, residential balance, and level tuning to a near-finished game.
- Worked with a 3D artist, a manager, and the client weekly; integrated 3D models and polished the game.

## SELECTED PROJECTS

**Tower Defense** | manoel-nohra.fr **Ongoing**

*Solo, own game idea | Unreal Engine 5 (C++, Blueprints) | playable start to finish, now polishing*

- Extended the **Gameplay Ability System** for tower, enemy, and boss stats and abilities.
- Wrote Python build and test scripts, and an Excel import tool for game data.

🏆 **Panic On Comic City!** | manoelnohra.itch.io **2026**

*Ubisoft Game Lab, Best Accessibility | 10 weeks, team of 8, main programmer | Unity (C#)*

- Co-op endless runner; wrote **custom 2D physics** so one player rides the other's ramp.
- Designed and built tricks, combos, and scoring; exposed difficulty settings for accessibility.

🏆 **The Plague** | manoelnohra.itch.io **2023**

*Montreal GameJam, Best Sound Design | 48h, team of 7 | Unity (C#)*

- Co-designed the core loop: infect civilians to light up the map and hunt the Doctor.
- Programmed the camera, character movement, and the Doctor's **enemy AI**.

## SKILLS

**Languages:** C++, C#, Python (scripting)
**Engines:** Unreal Engine 5 (Gameplay Ability System), Unity (UI Toolkit), Anvil
**Tools:** WPF/XAML, Wwise, Perforce, Git, Jira
**Spoken:** French (native), English (CELPIP 8), Arabic (Lebanese)

## EDUCATION

**Bachelor of Software Engineering** | École de technologie supérieure (ÉTS), Montreal **2026**
**DUT, Computer Technology** | Université Claude Bernard Lyon 1, France **2022**

## EXTRACURRICULAR

**Conjure Club (game creation), ÉTS** (2022–2026): organized GameJams; made games to jam deadlines.
**ÉTS Esports Club: Rocket League** (2022–2025): Supersonic Legend rank.
